

Accessories for Your Dock

Gangways

Wahoo Gangways can be found throughout the United States for a wide variety of applications. From commercial marinas and private docks to backyard ponds and walkways through marshland, our gangways are ideal for many applications because of their light weight, versatility and overall durability. They were developed in conjunction with our docks to be similarly durable, maintenance free and attractive. The design is extremely efficient, incorporating a welding truss into the handrail to provide maximum strength to material usage thereby optimizing value. The majority of the gangways we build come standard with the truss-handrail but we also manufacture gangways with no handrails up to 25'.

Features

Lightweight - ideal for installation and doesn't weigh down floating structures

Long Single - Span Lengths - reduces number of required pilings for long runs

Durable - welded aluminum structure proven to withstand extreme environments

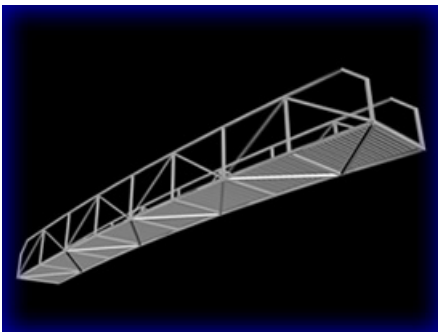

Long Lasting - marine-grade aluminum will not structurally deteriorate even after many years in the harshest marine environments

Attractive - maintains a clean, neat look

Affordable - price competitive even with pressure treated lumber

Standard Specs

Live Load...	50 #/ sq. ft. 100 #/ sq. ft. available
Span...	up to 60' up to 100' available
Width - 4'...	48" inside, 52" outside
Width - 3'...	36" inside, 40" outside other widths available
Height...	36" to top of handrail
Profile...	pre-stressed arch or flat
Material...	aluminum - 6000 series

Ladders

MATERIALS: 6063 MARINE GRADE ALUMINUM
EXTRUDED LADDER RUNG
VINYL COATED CABLE "TETHER"

DIMENSIONS: EXTENDED - 86" overall
62" dock to bottom rung
RETRACTED- 25" " to " "

TOP OF HAND RAIL "LOOP" IS 24" FROM DOCK

(NOTE: all measurements are approximate)

Part	Retail Price
5-step straight	\$200.00
5- step retractable	\$221.00
4-step straight	\$190.00

Decking

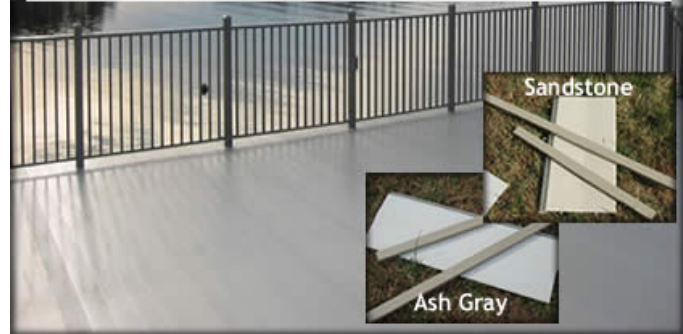

LP® WeatherBest® Decking

Wahoo uses a variety of composite wood and alternative options in a variety of colors depending on location, specific application and desired features. The proper choice can deliver a low maintenance, long life solution.

AridDek Aluminum Decking

- Non-slip baked enamel finish
- Seamless (up to 32' lengths), waterproof
- Easy to clean
- Coolest to touch of all decking options
- Requires no sealants or stains
- Impervious to insect damage, rot and decay
- Neat, clean look, available in Ash Gray and Sandstone
- Useful for main and upper deck applications

IPE-Ironwood

- Natural, untreated wood imported from Brazil
- Three times harder than Red Oak
- Naturally resistant to insect damage
- Naturally resistant to surface checking and molds
- Greater load bearing capability than other woods
- Smooth and splinter free for many years

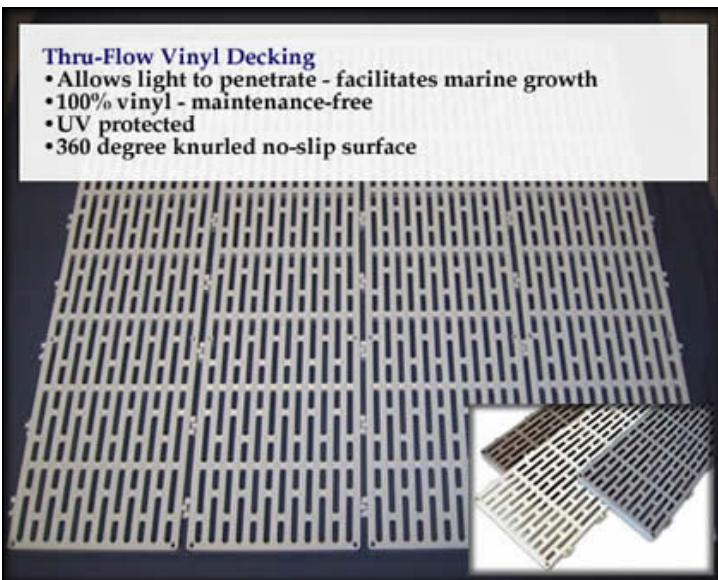

Concrete Pavers

- Maintenance-free
- Heavy load bearing capability
- Easy access to dock structure (for conduit access)
- Impervious to insect damage, rot and decay
- Commonly used in commercial applications

Thru-Flow Vinyl Decking

- Allows light to penetrate - facilitates marine growth
- 100% vinyl - maintenance-free
- UV protected
- 360 degree knurled no-slip surface
